

(Verbesserte) Clinchknoten

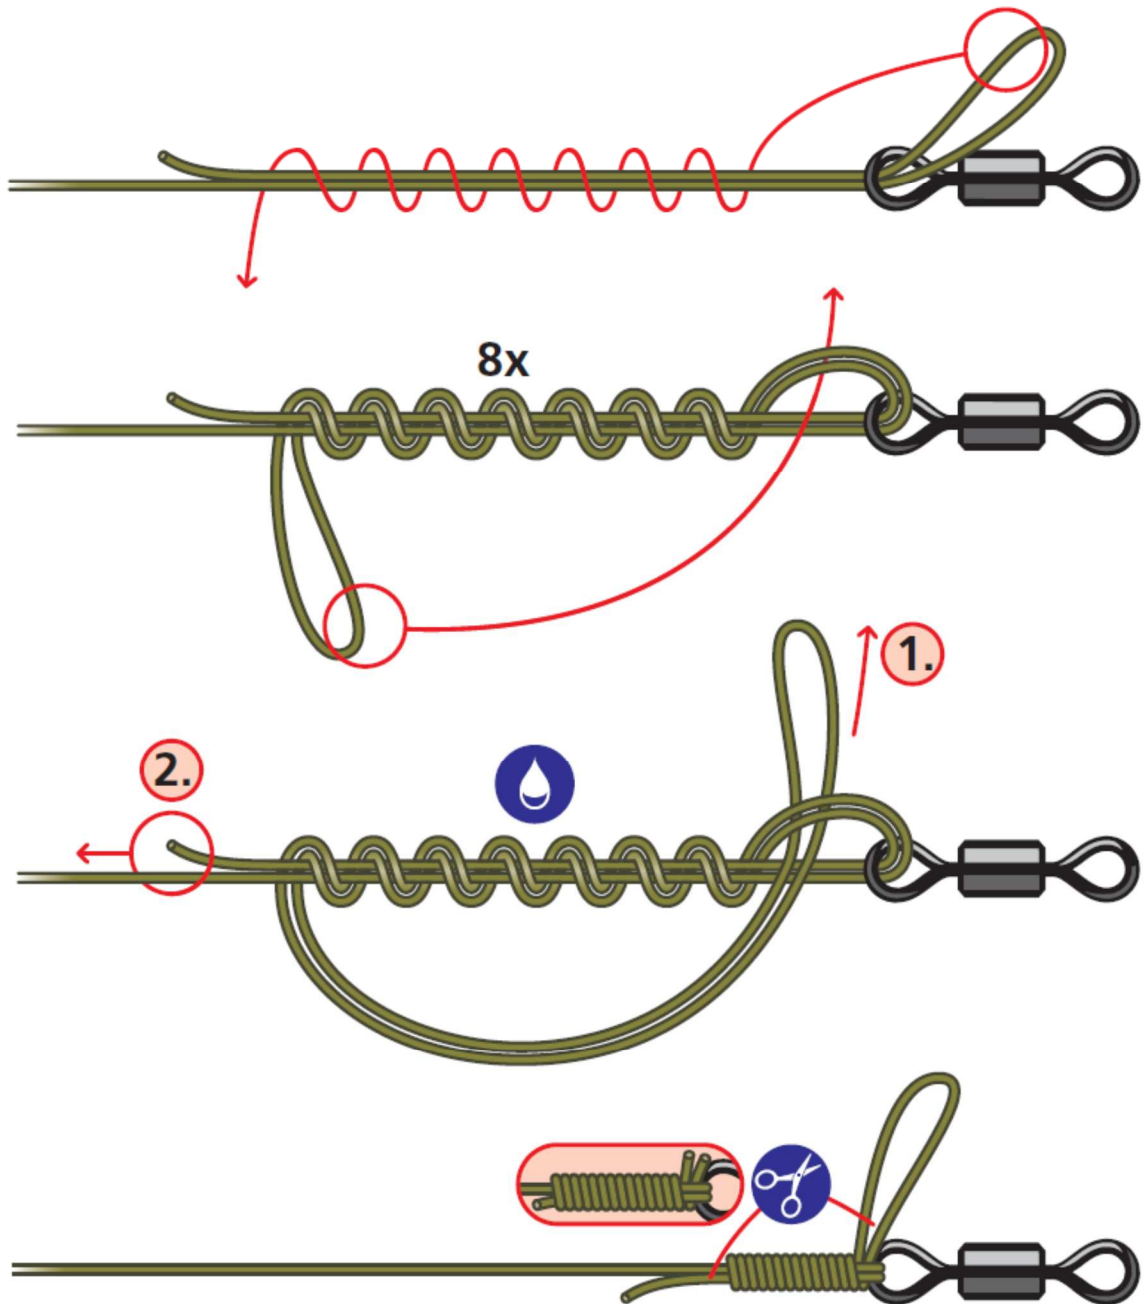

Uniknoten (Grinnerknoten)

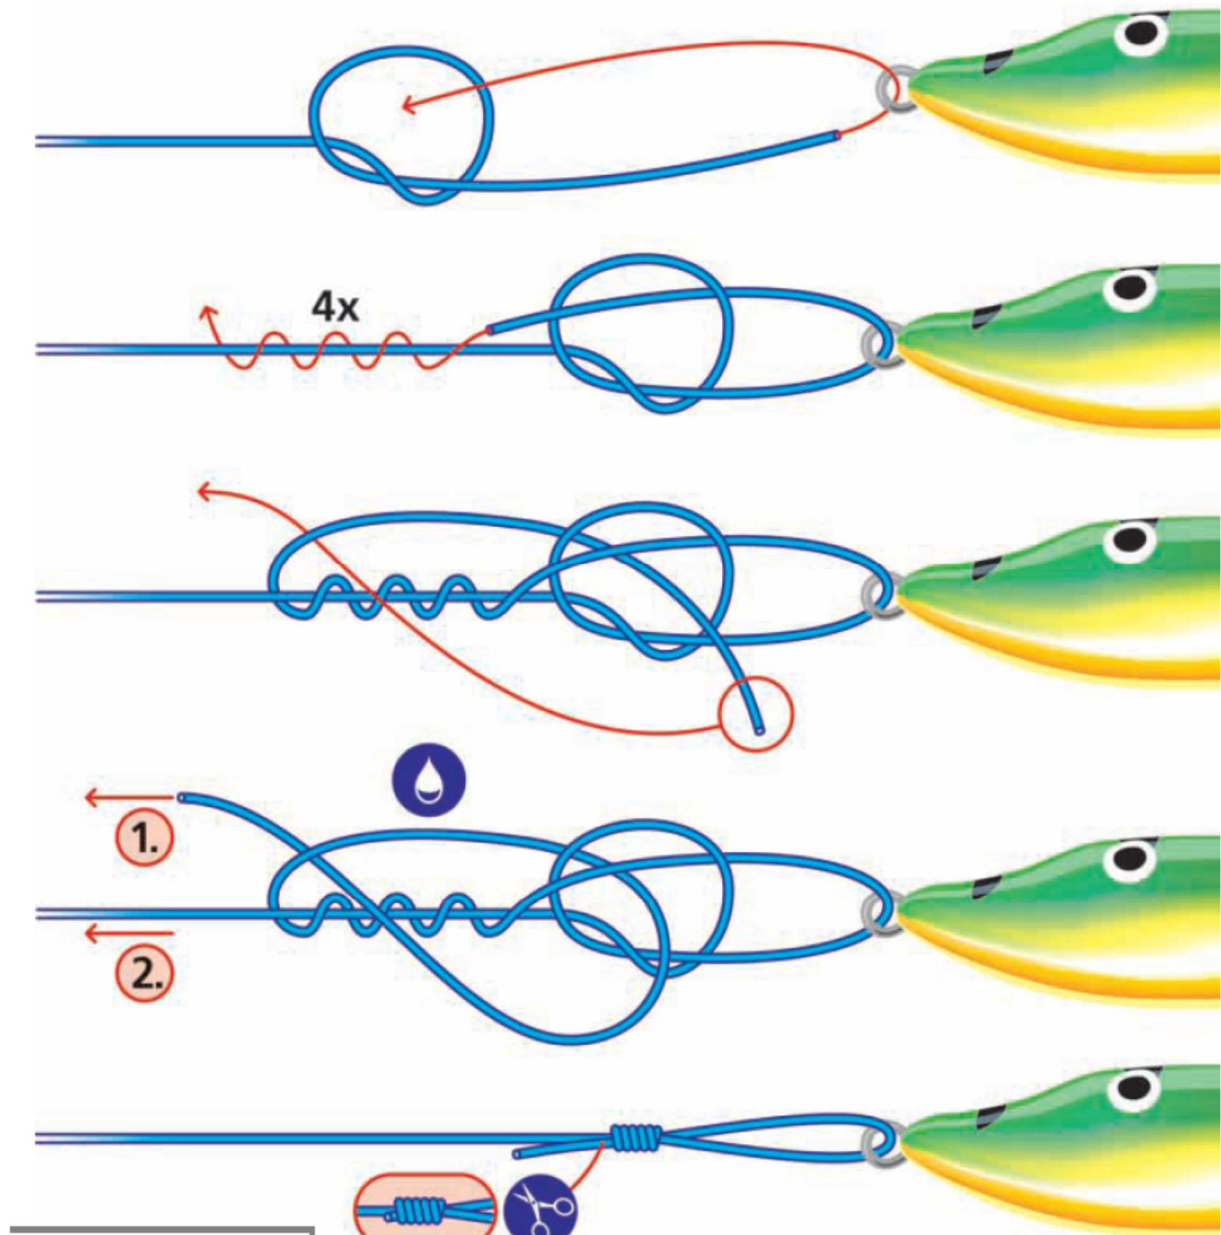

Palomarknoten

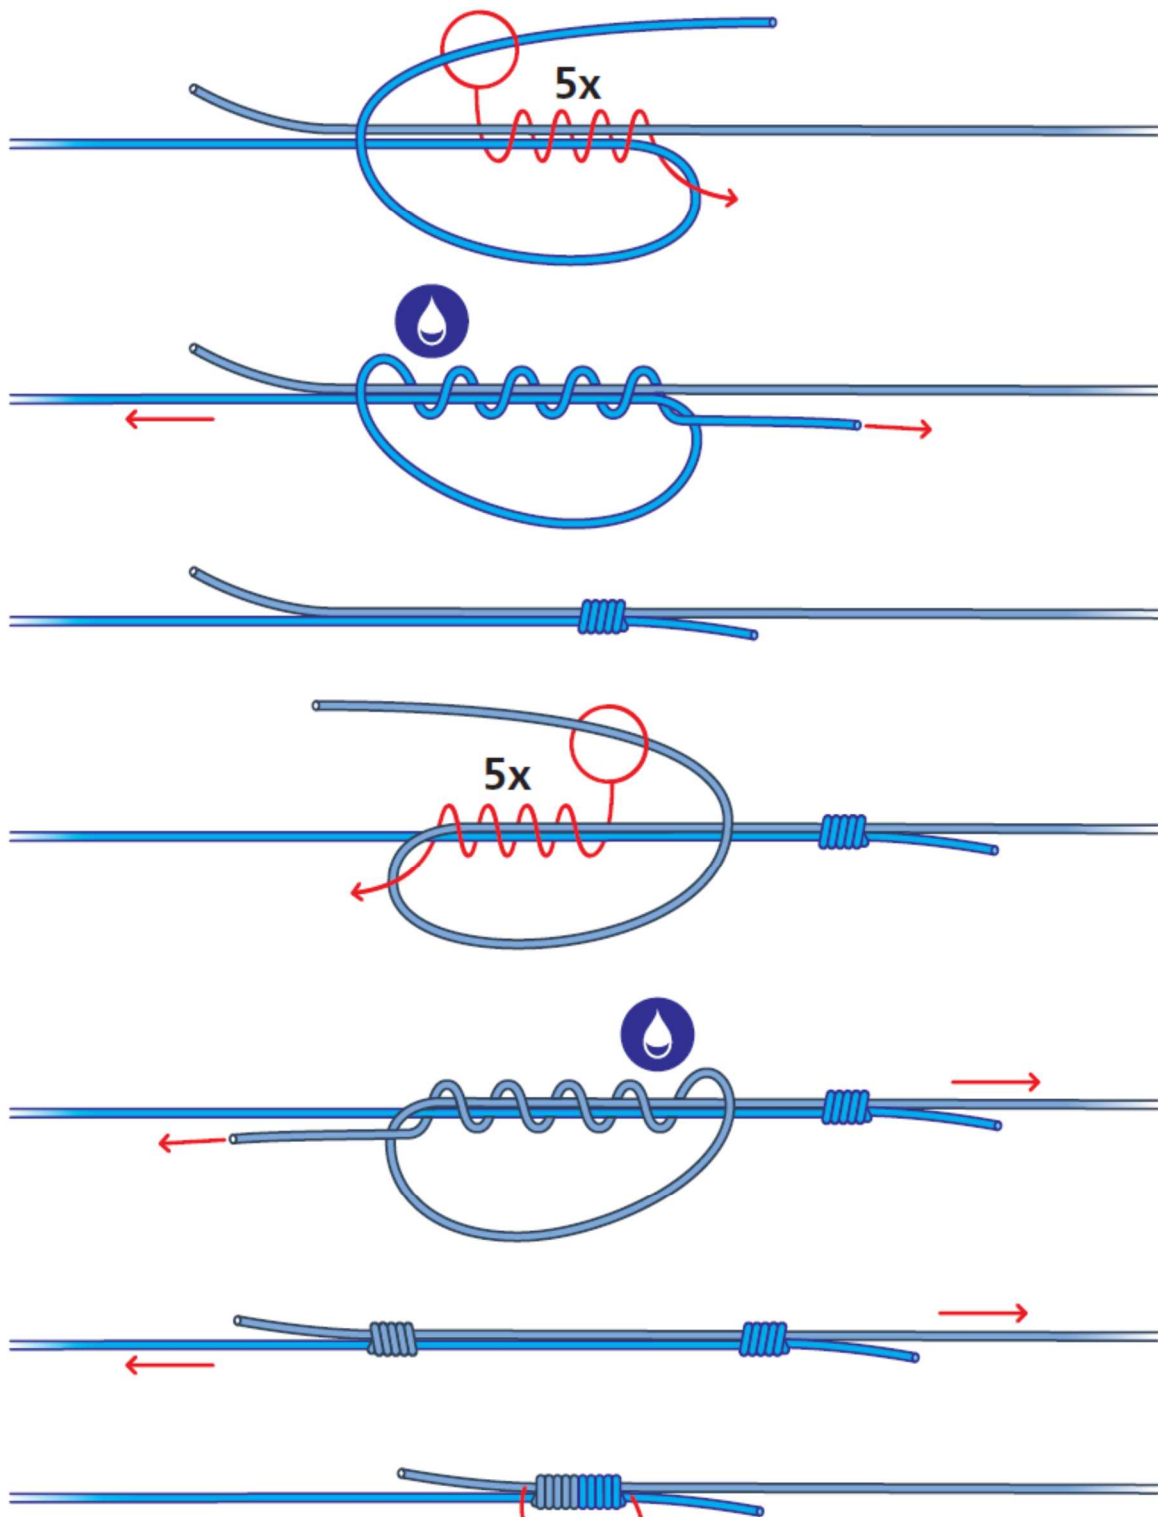

Clinch mit Doppelschnur

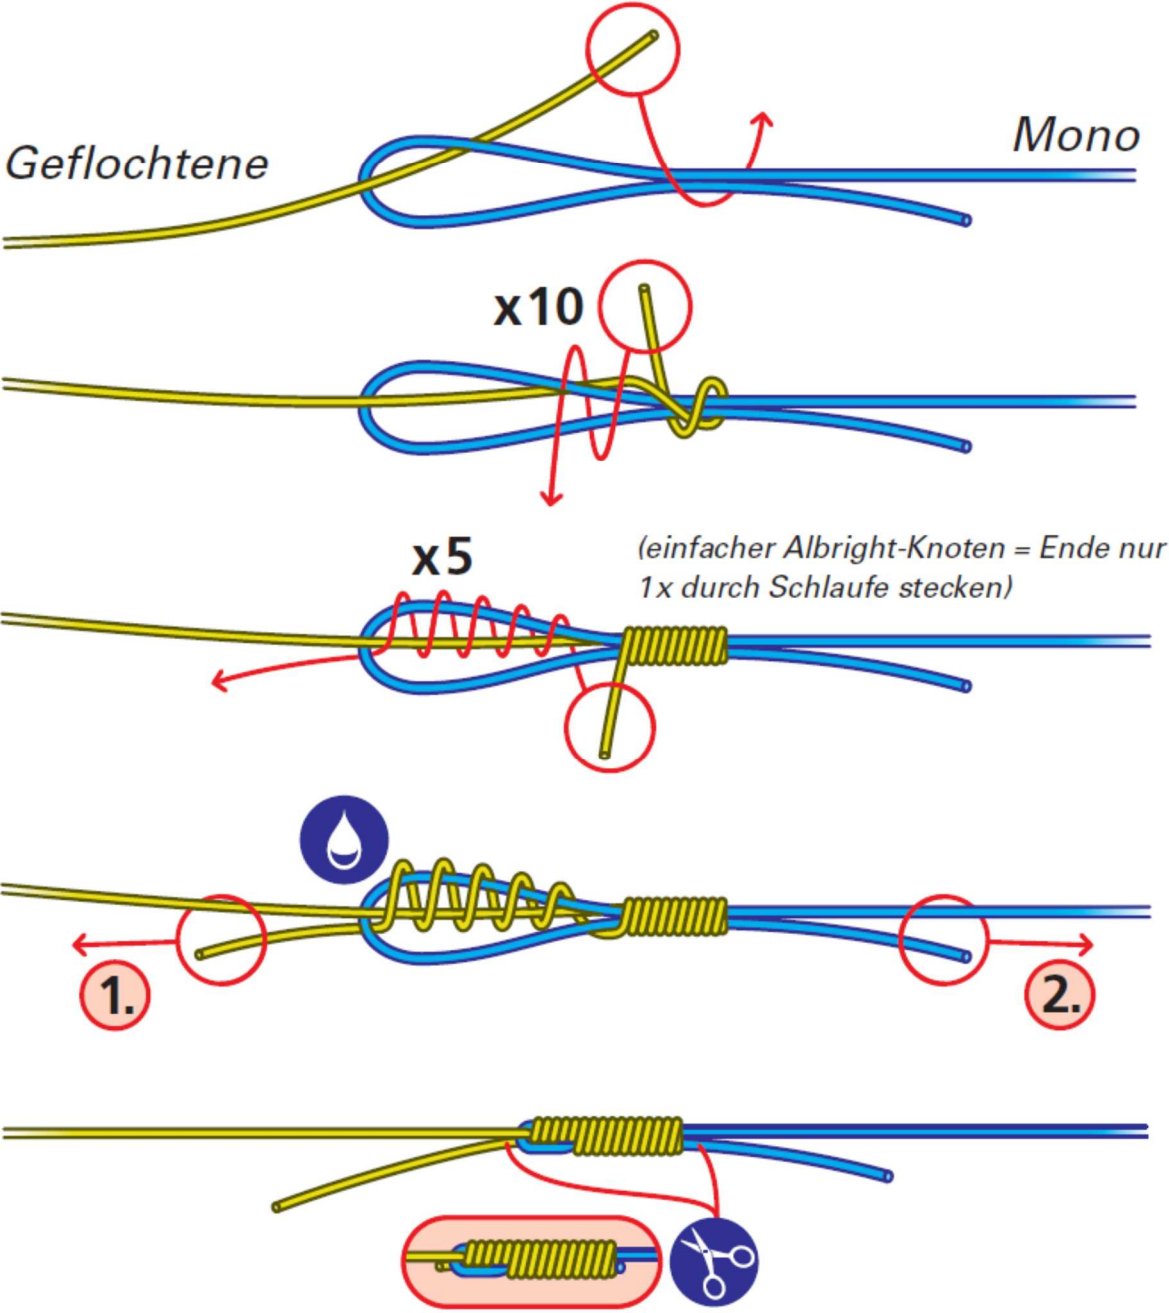

Rapala-Knoten

Doppelter Grinnerknoten

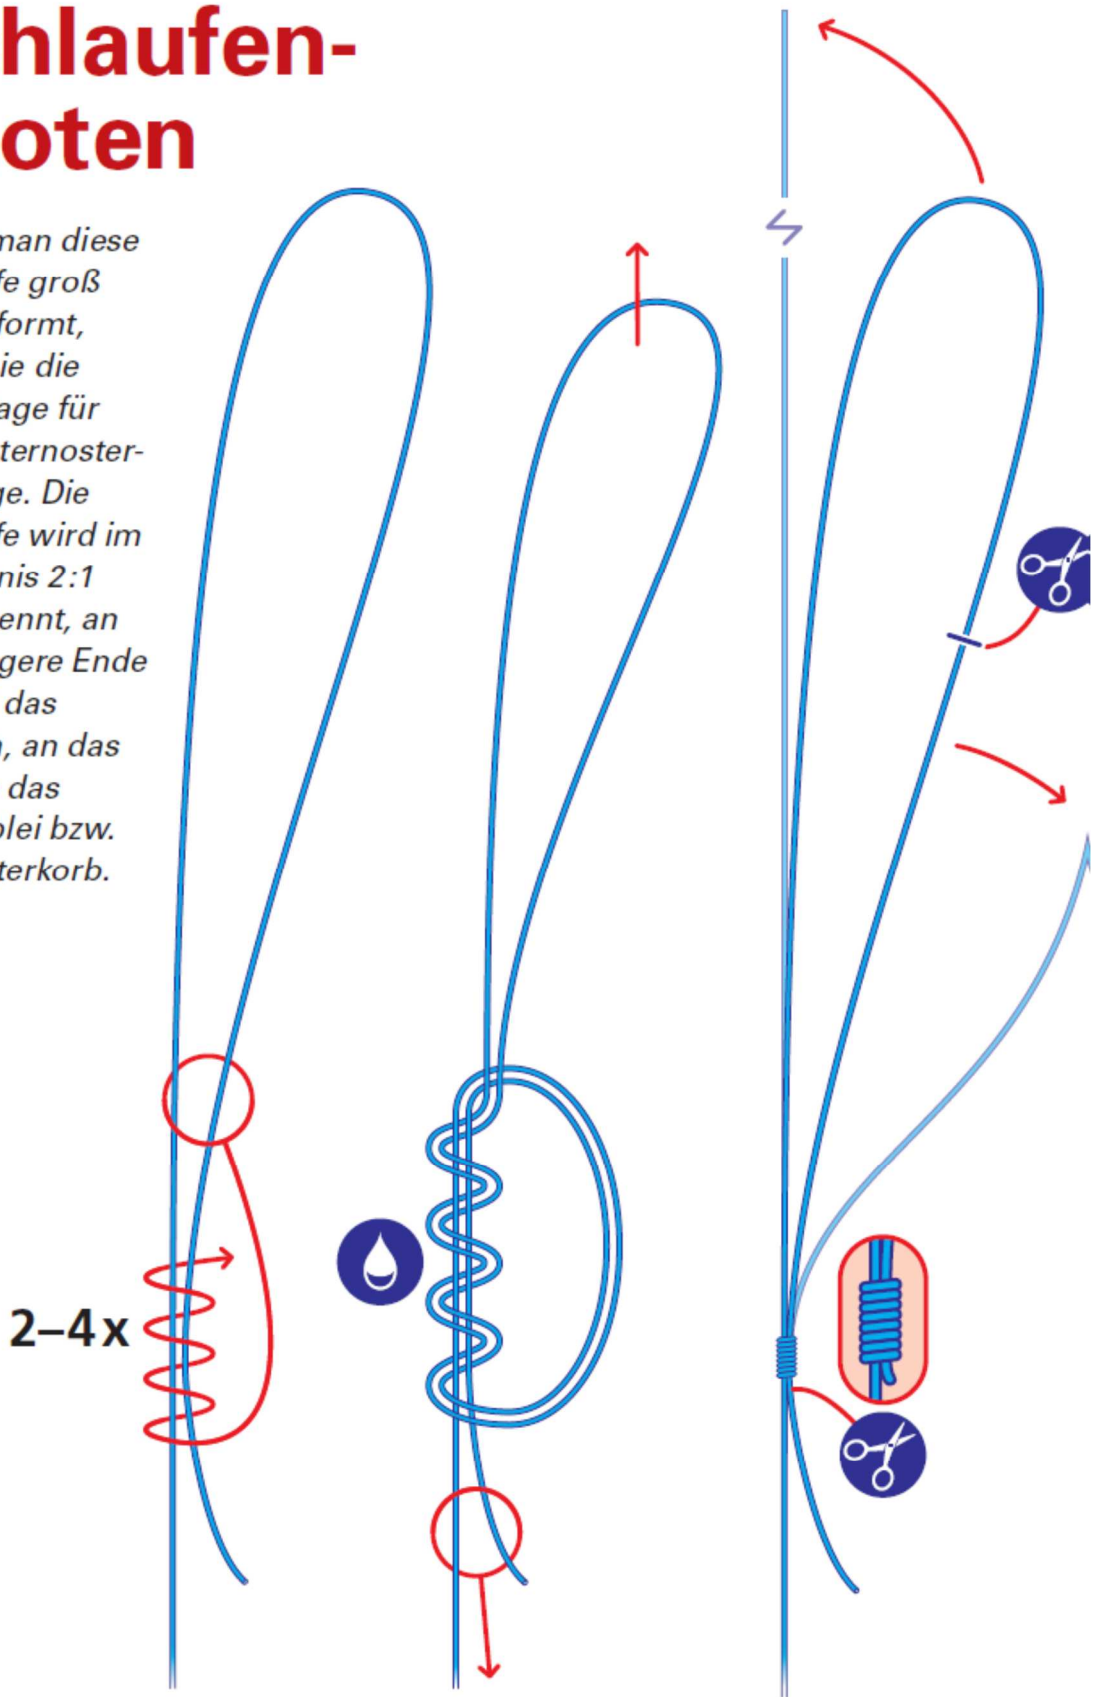

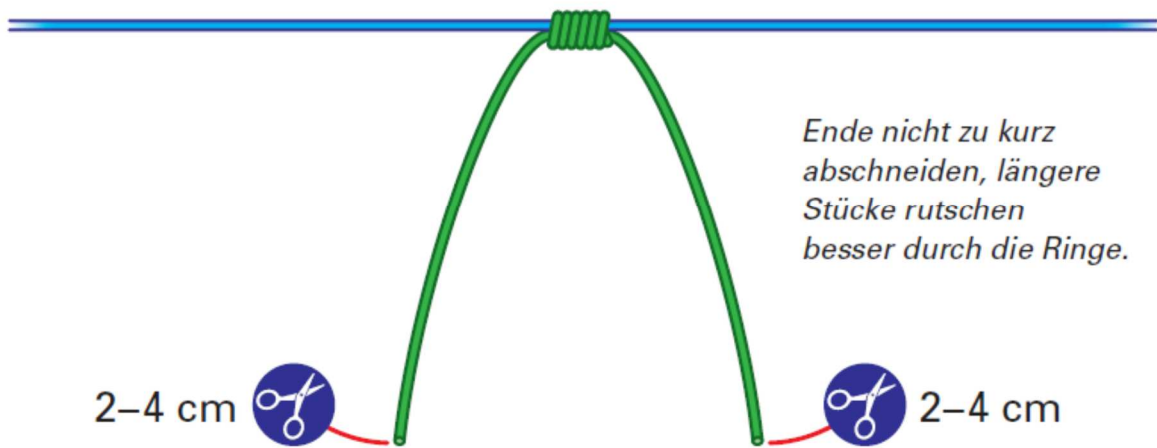

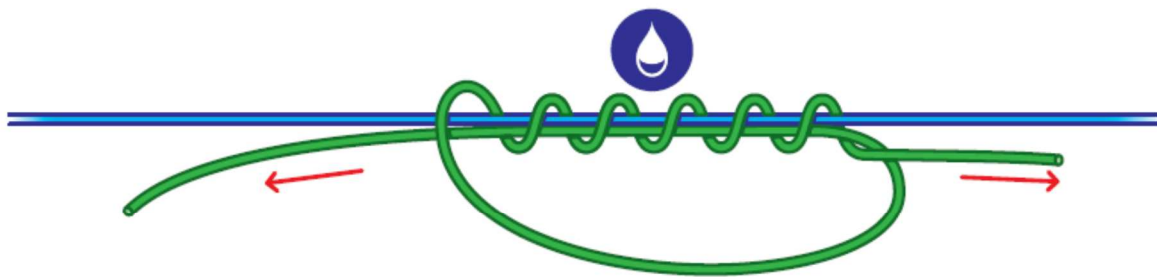

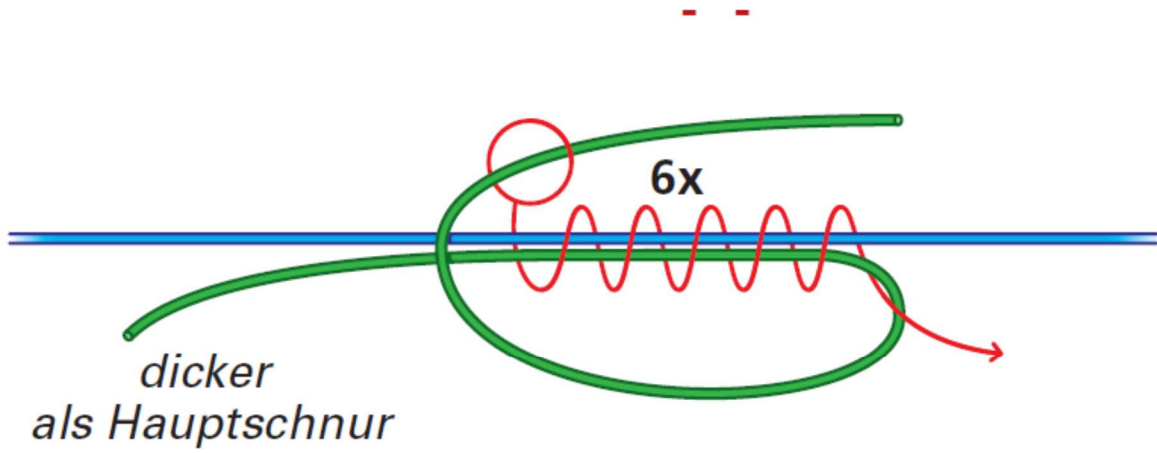

(Verbessertes) Albright-Knoten

Schlaufenknoten

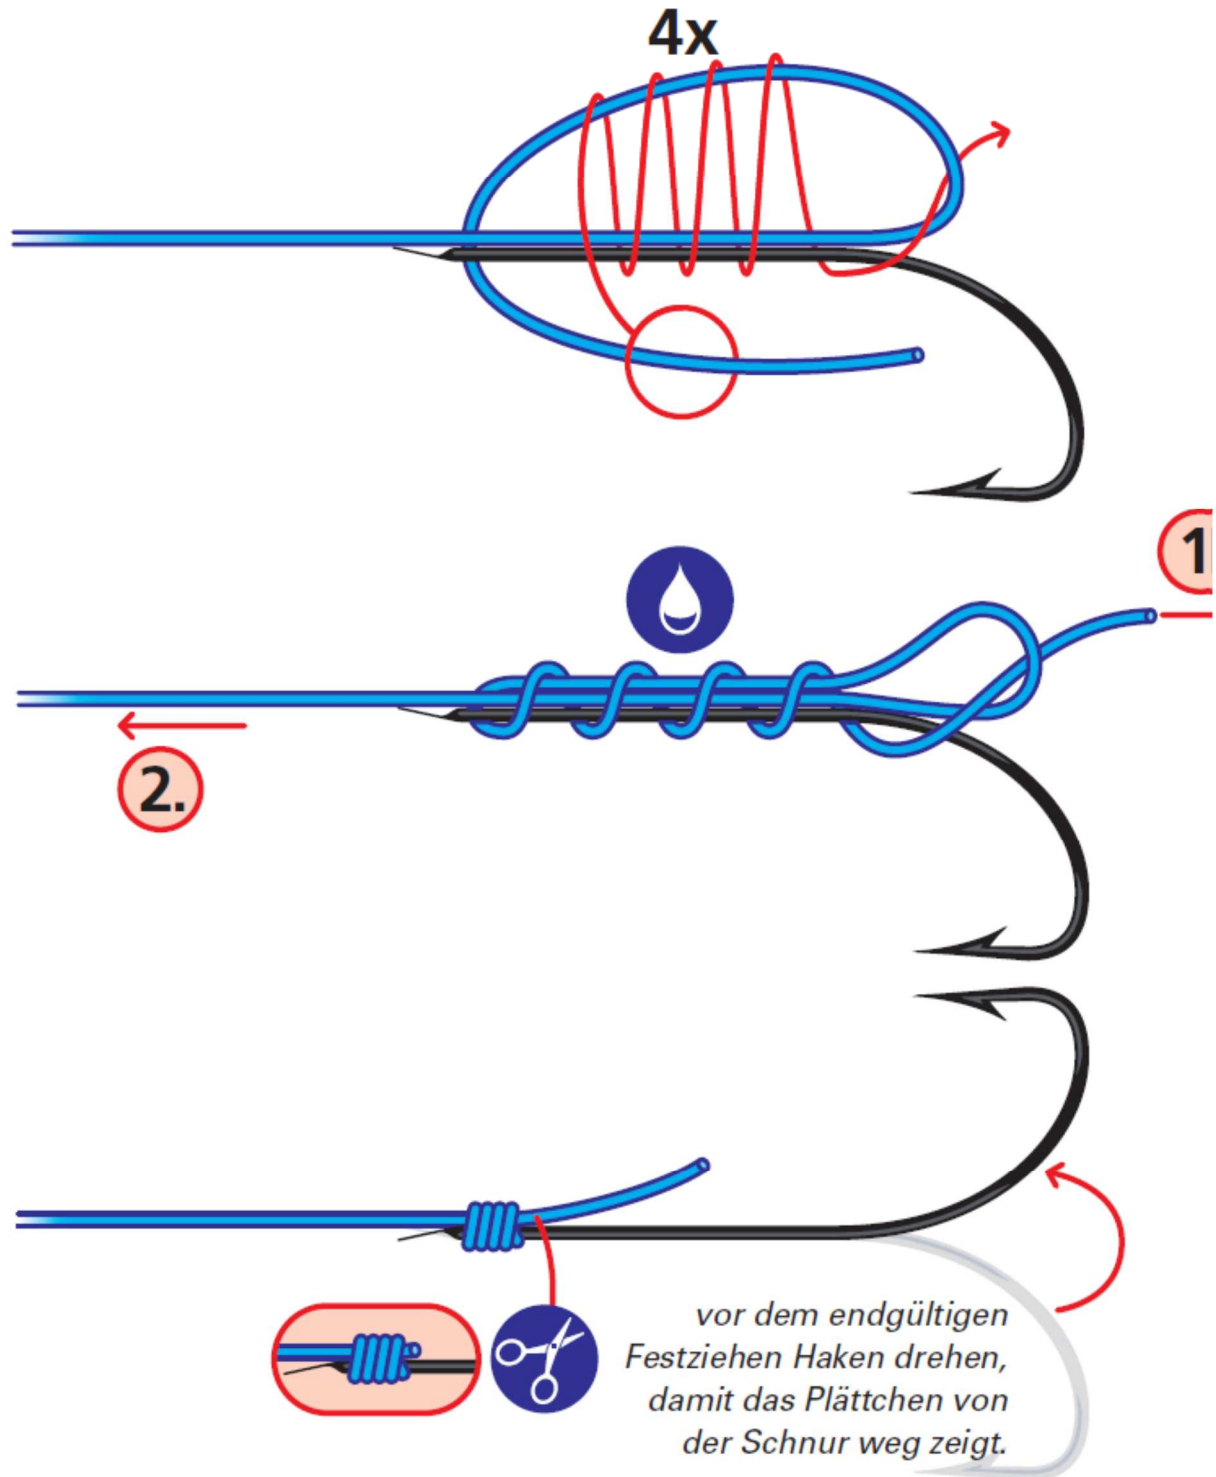

Wenn man diese Schlaufe groß genug formt, bildet sie die Grundlage für eine Paternoster-Montage. Die Schlaufe wird im Verhältnis 2:1 aufgetrennt, an das längere Ende kommt das Vorfach, an das kürzere das Bodenblei bzw. der Futterkorb.

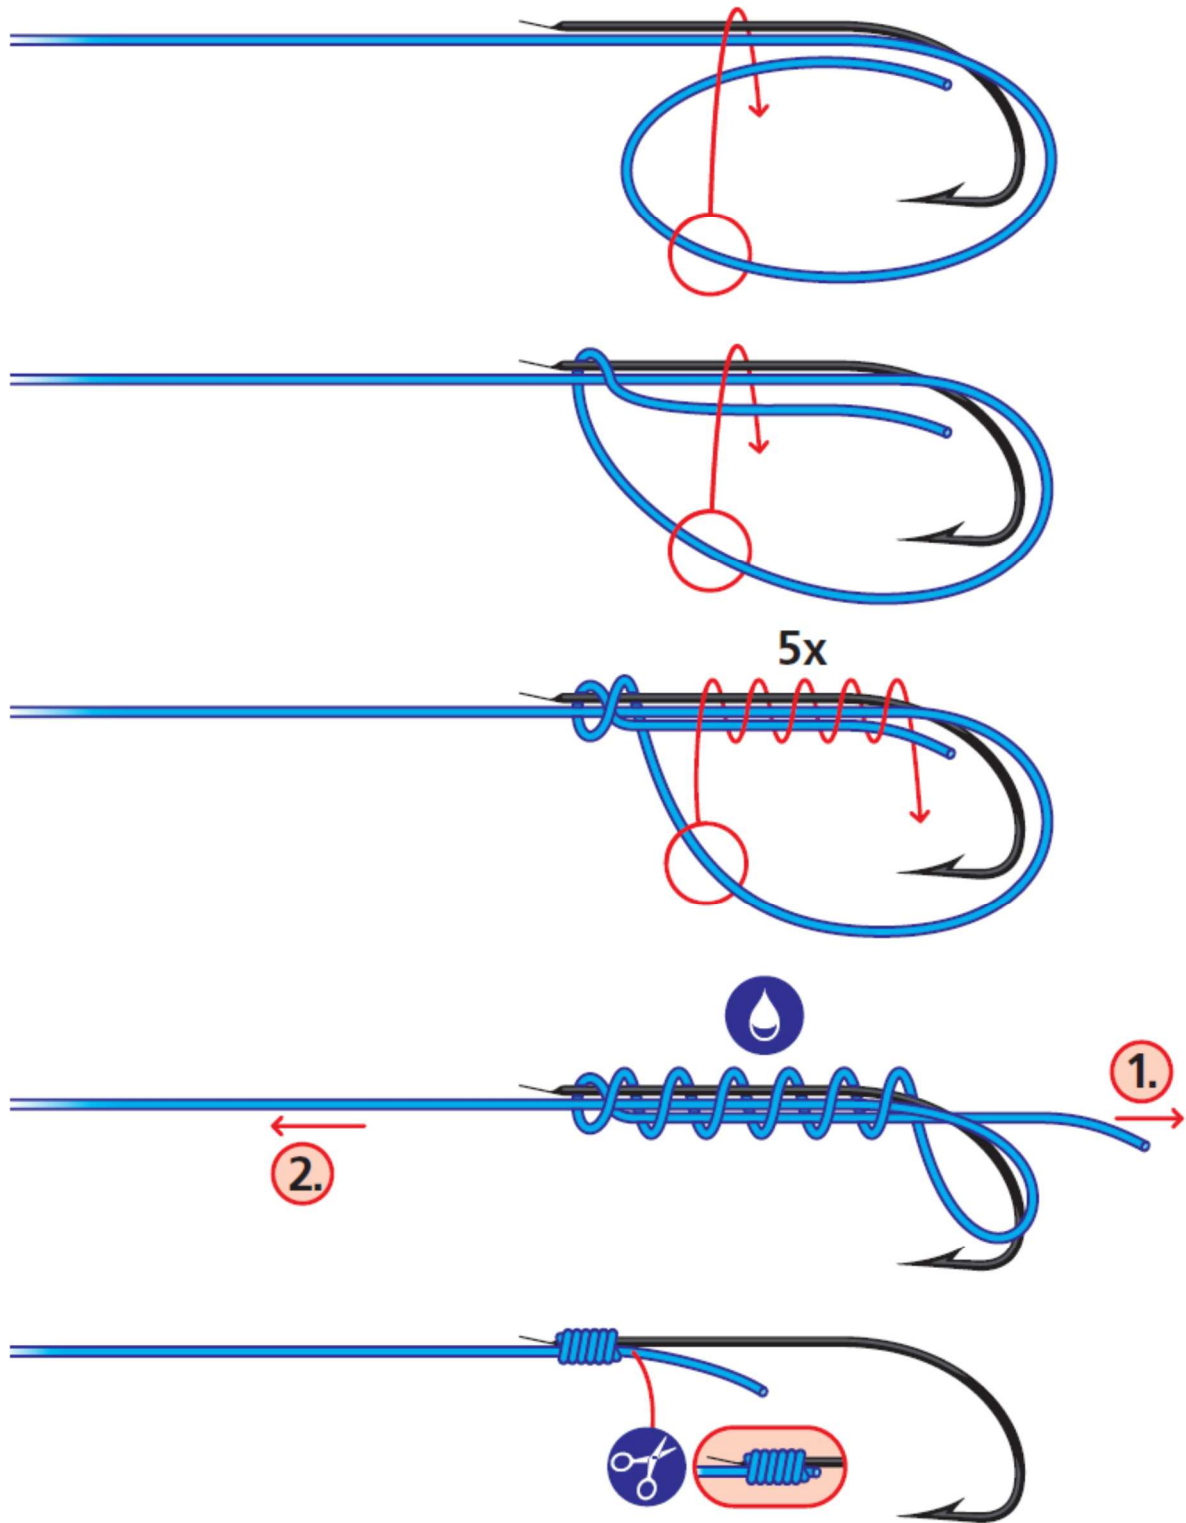

Knoten für Plättchenhaken

Knoten 1

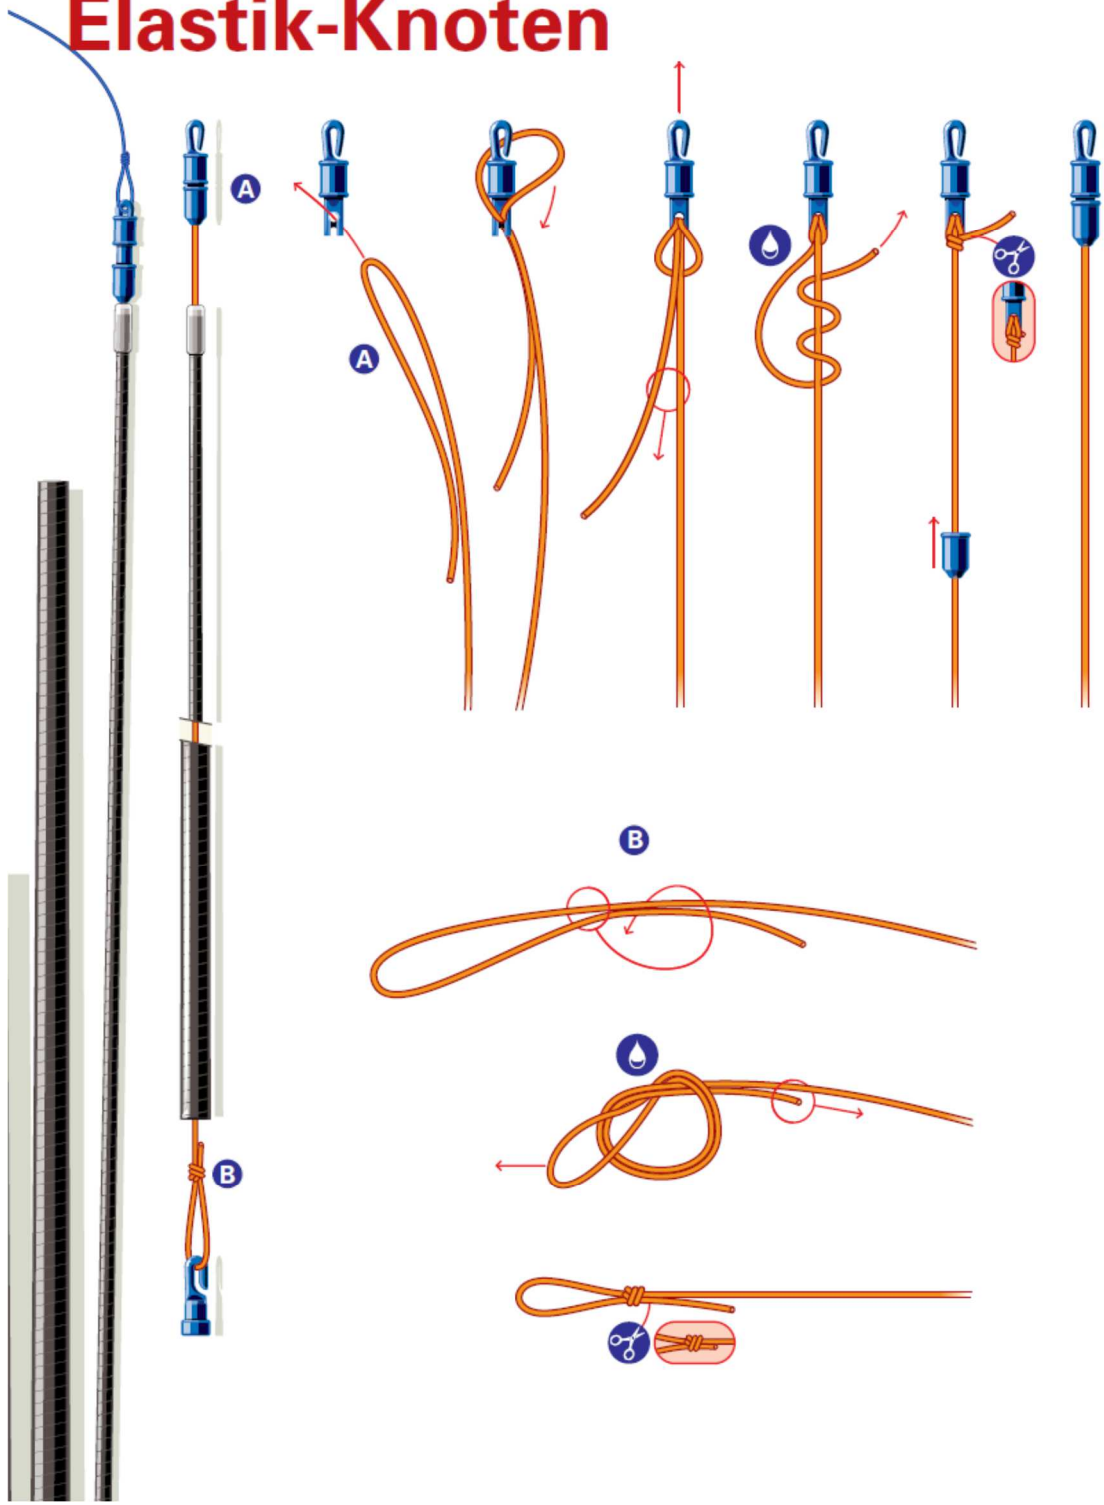

Knoten 2

Knoten für Kopfruten-Gummi

Elastik-Knoten

Hauptschnur-Vorfach

Schlaufen-Verbindung
